Capabilities

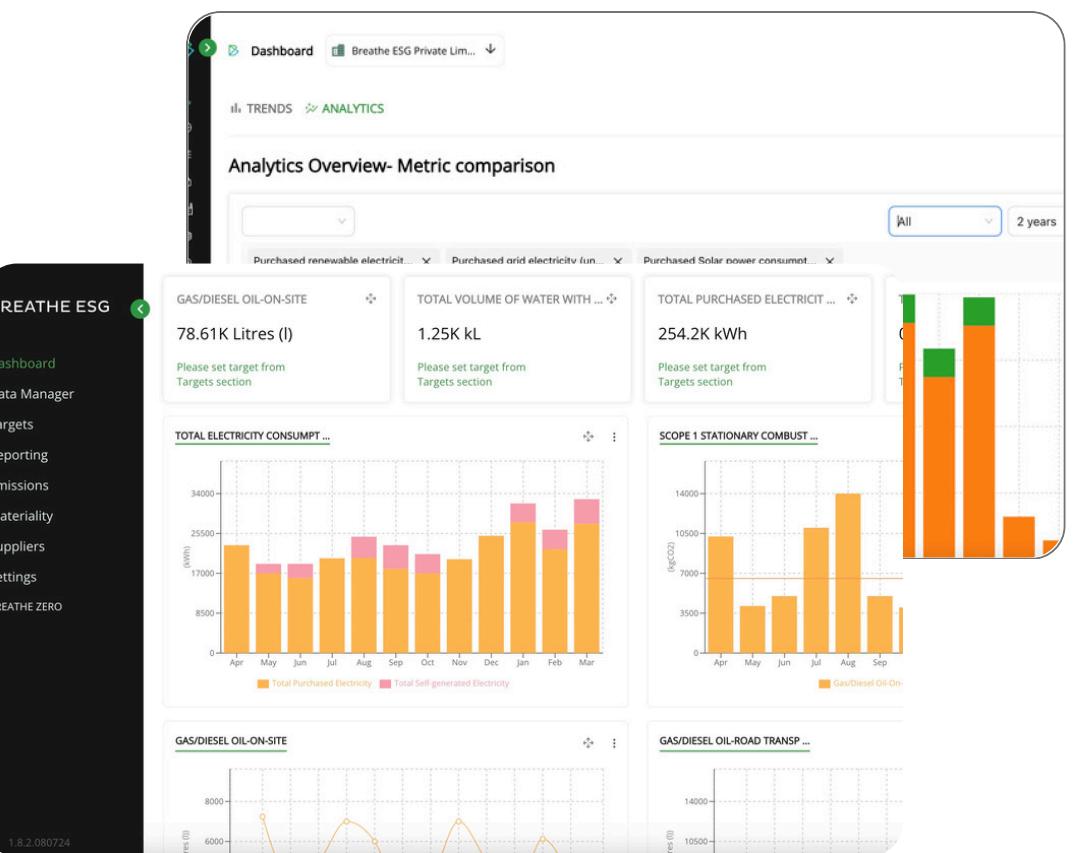

Breathe ESG

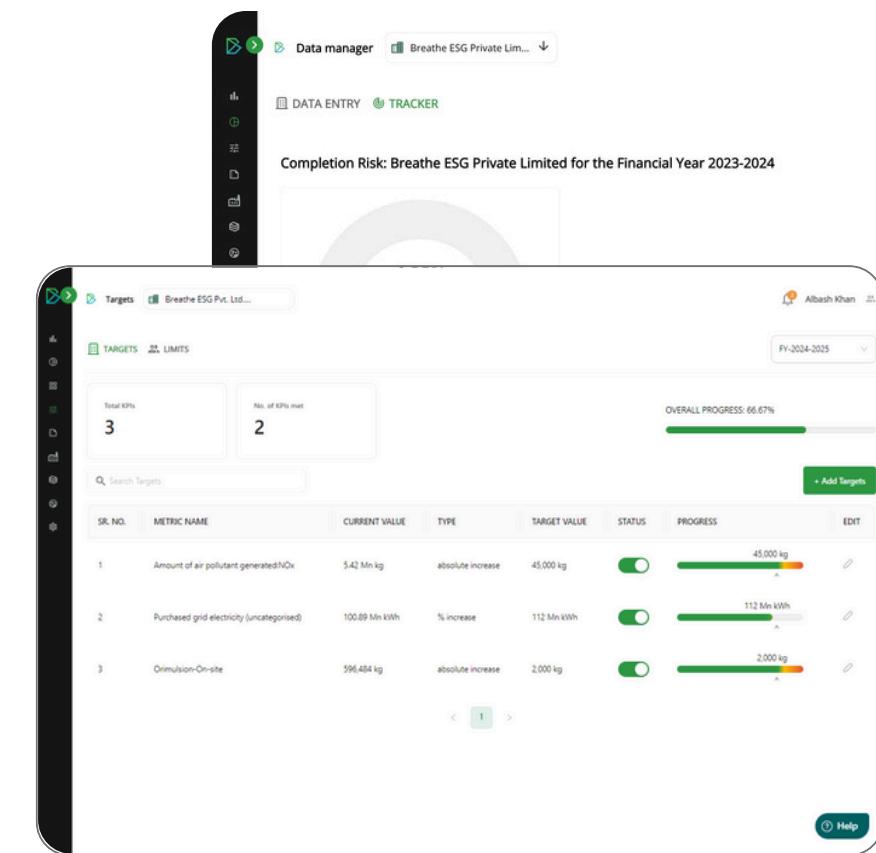

Measure

Analyse

Monitor

- Calculate derived ESG metrics
- Scope 1 and 2 emission calculations
- Custom Configurations

- Interactive Trends Dashboards
- Customisable Analytics Dashboard
- Predictive Analytics powered by AI

- Set and Track Targets at Granular Levels
- Monitor Data Maturity
- Assess Stakeholder Contributions with Scorecards

Capabilities

Breathe ESG

Assess

The screenshot shows the 'Supplier Assessment' section of the Breathe ESG platform. It includes a 'Materiality Assessments' matrix for stakeholders like Transparency on Products, Services and Pricing, Labour Conditions, Employment Practices, and Customer Privacy. Below this is a summary of the 'Breathe ESG Supplier Assessment' with an average score of 71.74%, a medium risk classification, and 7 suppliers engaged. A 'Supplier Breakdown by Risk Classification' chart shows 50.00% High risk, 25.00% Medium risk, and 25.00% Low risk. The 'Supplier Risk Score' section details various risk metrics across categories such as Employee training and education, Management Systems & Processes, and Grievance redressal.

Manage

This screenshot displays the 'Users' management screen. It lists all users (8) with columns for Name, Email, Role, and Department. Below this is a 'Notifications' section showing a list of alerts and notifications from various users and roles, such as 'Survey completion status alert' and 'Limit exceeded on a metric'.

Report

The screenshot shows the 'Reporting' section with a list of reports for 'Indigrid BRSR' and 'Karan', both in progress. An 'Add template' dialog is open, prompting the user to choose a framework, specifically mentioning the Global Reporting Initiative (GRI) Standards. The dialog also lists other reporting frameworks like BSR, GESCA, TCFD, and SASB.

- Assess Internal and External Stakeholders
- Develop Materiality Matrix
- Understand Core Value Chain Risks

- Role Based Access Controls for Users
- Notifications Configurations
- Monthly Email Summary

- Report Across Global Standards
- Autofill Reports from Data Manager
- Collaborate with Chat and Assign Features

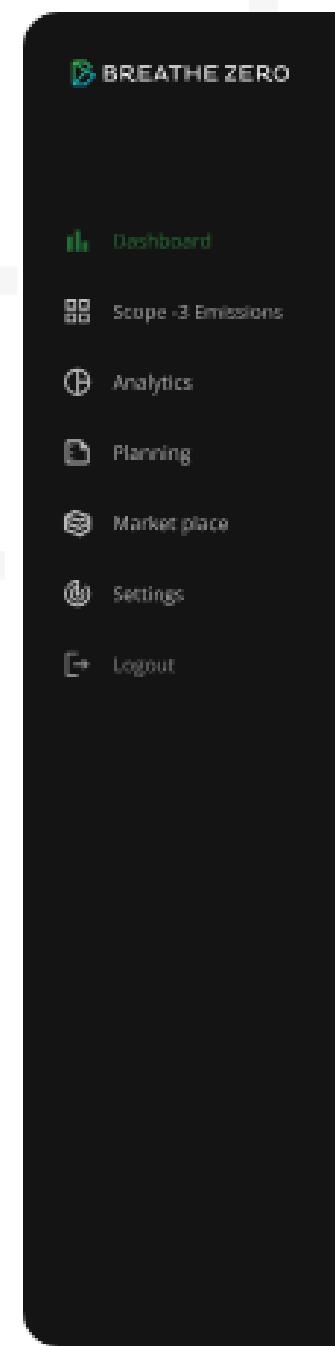

Breathe Zero

 BREATHE ESG

Simplify Scope 3 Reporting

Breathe Zero empowers you to measure & report scope 3 emissions in accordance with the GHG protocol, strategize & implement your path to net-zero....
All in one platform.

Security

Data Encryption	
In Transit	TLS 1.2+ encryption to protect data from man-in-the-middle attacks.
At Rest	AES-256 encryption in all storage locations, including databases, backups, and file storage.

Data Storage and Backup	
Primary Database	PostgreSQL is used as the main relational database for storing structured data
NoSQL	MongoDB and Redis are used for unstructured and cached data storage.
Backup Strategy	Automated, encrypted daily backups of databases and file storage are stored in different geographical locations.
Disaster Recovery	In the event of a failure, the Recovery Time Objective (RTO) is set to less than 2 hours, and the Recovery Point Objective (RPO) is less than 15 minutes.

AI Use Cases

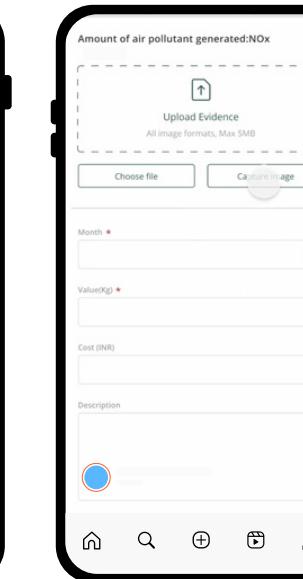

INARA 1

Autofill

Validate

ASK INARA

What ESG factors should we prioritize to align with global investor expectations?

Leading investors focus on climate risk, supply chain transparency, governance integrity, and social impact. I can help map your existing disclosures to frameworks like TCFD, SASB, and CSRD — and identify gaps for strategic alignment.

Ask anything.

Leveraging AI to simplify meticulous data collection and sustainability management

Expert-led Training and Certifications

Breathe Academy offers expert-led training and certifications to help organisations and individuals master sustainability and ESG principles, ensuring they stay ahead in the evolving ESG landscape.

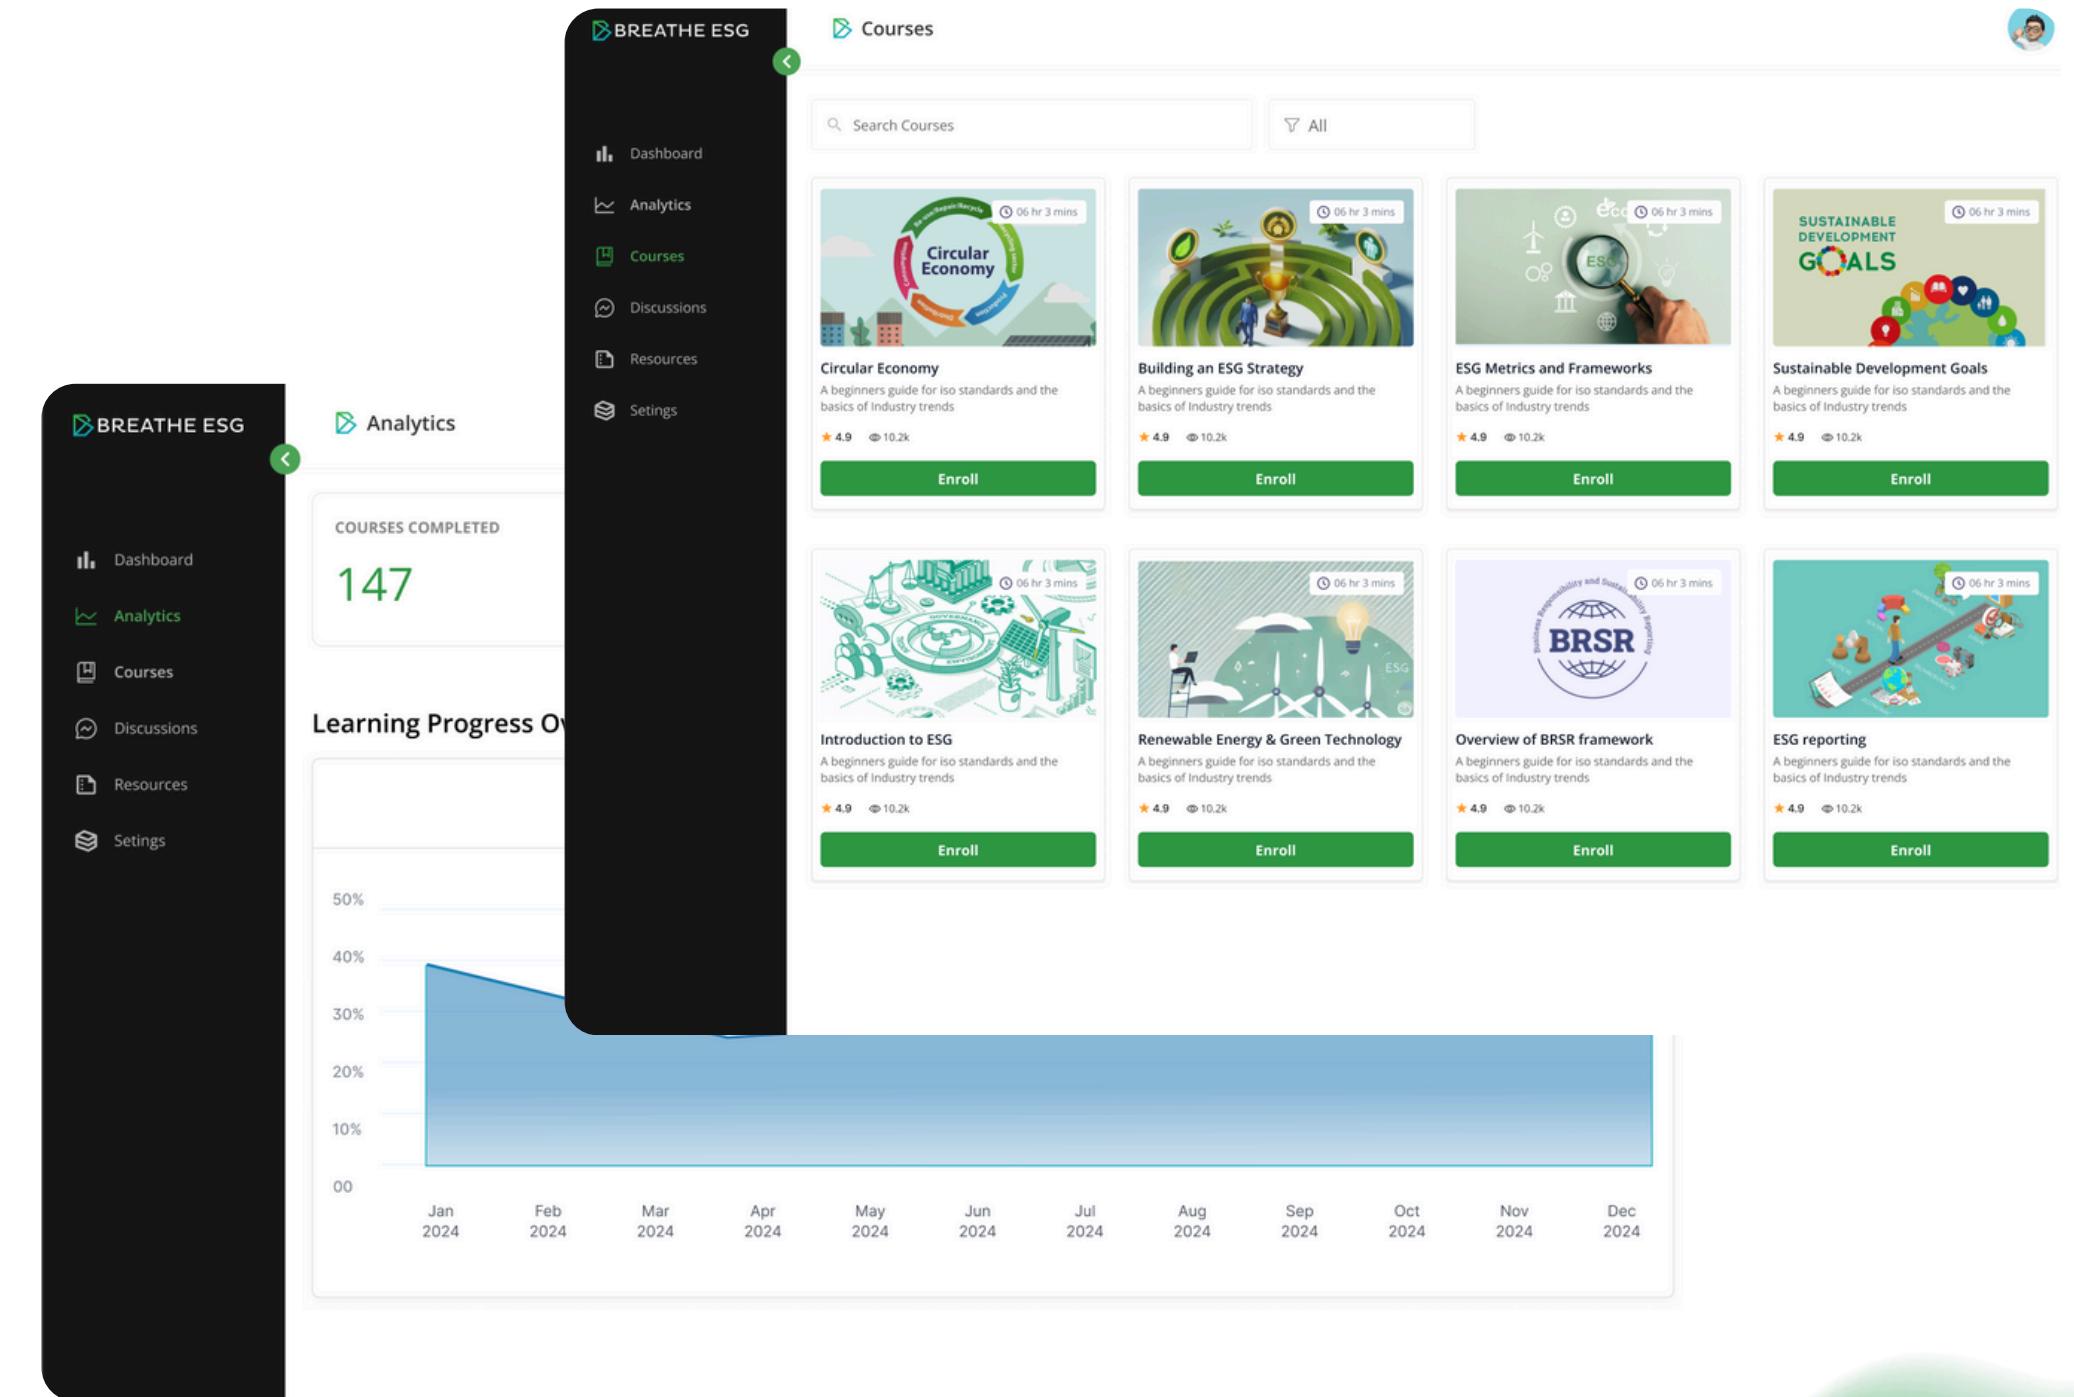

Expert-led Training and Certifications

- Expert-led training programs for ESG and sustainability.
- Certifications to enhance professional and organizational credentials.
- Tailored workshops for different industries and ESG frameworks.
- Flexible online and in-person learning options.
- Designed to help organizations stay compliant and lead in sustainability.

Expert-led Training and Certifications

- ESG Courses and certifications provided by reputed institutions
- Breathe ESG platform training and certifications provided to users
- Regulatory training for KMPs and Board members
- Interactive Live and Batch Modules
- Industry and Activity Specific Modules
- Learning Progress Management Module

The screenshot displays two main sections of the Breathe ESG platform:

- Courses Module:** This section shows a grid of eight course cards. Each card includes a thumbnail, title, description, rating (4.9), and enrollment count (10.2k). The courses are:
 - Circular Economy:** A beginners guide for iso standards and the basics of Industry trends.
 - Building an ESG Strategy:** A beginners guide for iso standards and the basics of Industry trends.
 - ESG Metrics and Frameworks:** A beginners guide for iso standards and the basics of Industry trends.
 - Sustainable Development Goals:** A beginners guide for iso standards and the basics of Industry trends.
 - Introduction to ESG:** A beginners guide for iso standards and the basics of Industry trends.
 - Renewable Energy & Green Technology:** A beginners guide for iso standards and the basics of Industry trends.
 - Overview of BRSR framework:** A beginners guide for iso standards and the basics of Industry trends.
 - ESG reporting:** A beginners guide for iso standards and the basics of Industry trends.
 Each card features a green "Enroll" button at the bottom.
- Analytics Module:** This section shows a dashboard with a large green "COURSES COMPLETED" count of 147. Below this is a chart titled "Learning Progress Over Time" showing a downward trend from January to December 2024. The x-axis represents months from Jan 2024 to Dec 2024, and the y-axis represents percentage from 0% to 50%.
